Prelude in the American Gods series.

Young. Wealthy. Elite. Attractive. The gentlemen's secret society at Yale was filled with them.

And Nathaniel Radcliffe, the bane of my existence, was one of them.

As the right hand of the American Gods, he was conceited and arrogant. A dangerously handsome man in a tailored custom suit and shiny black oxford loafers.

The classroom was our battlefield. We made a sport out of arguing and debating, ready to do anything in order to win over the other.

Deadly opponents, deadlier minds.

I'd sworn I'd never give him the upper hand, until...

The secret I've been hiding for the last three years?

He just discovered it... and now he has all the power.
