Invite Hannibal Lecter into the palace of your mind and be invited into his mind palace in turn. Note the similarities in yours and his, the high vaulted chambers of your dreams, the shadowed halls, the locked storerooms where you dare not go, the scrap of half-forgotten music, the muffled cries from behind a wall.

In one of the most eagerly anticipated literary events of the decade, Thomas Harris takes us once again into the mind of a killer, crafting a chilling portrait of insidiously evolving evil—a tour de force of psychological suspense.

Seven years have passed since Dr. Hannibal Lecter escaped from custody, seven years since FBI Special Agent Clarice Starling interviewed him in a maximum security hospital for the criminally insane. The doctor is still at large, pursuing his own ineffable interests, savoring the scents, the essences of an unguarded world. But Starling has never forgotten her encounters with Dr. Lecter, and the metallic rasp of his seldom-used voice still sounds in her dreams.

Mason Verger remembers Dr. Lecter, too, and is obsessed with revenge. He was Dr. Lecter's sixth victim, and he has survived to rule his own butcher's empire. From his respirator, Verger monitors every twitch in his worldwide web. Soon he sees that to draw the doctor, he must have the most exquisite and innocent-appearing bait; he must have what Dr. Lecter likes best.

Powerful, hypnotic, utterly original, **Hannibal** is a dazzling feast for the imagination. Prepare to travel to hell and beyond as a master storyteller permanently alters the world you thought you knew.

Horror lit's head chef Harris serves up another course in his Hannibal "The Cannibal" Lecter trilogy, and it's a pièce de résistance for those with strong stomachs. In the first book, *Red Dragon* (filmed as *Manhunter*), Hannibal diabolically helps the FBI track a fascinating serial killer. (Takes one to know one.) In *The Silence of the Lambs*, he advises fledgling FBI manhunter Clarice Starling, then makes a bloody, brilliant escape.

Years later, posing as scholarly Dr. Fell, curator of a grand family's palazzo, Hannibal lives the good life in Florence, playing lovely tunes by serial killer/composer Henry VIII and killing hardly anyone himself. Clarice is unluckier: in the novel's action-film-like opening scene, she survives an FBI shootout gone wrong, and her nemesis, Paul Krendler, makes her the fall guy. Clarice is suspended, so, unfortunately, the first cop who stumbles on Hannibal is an Italian named Pazzi, who takes after his ancestors, greedy betrayers depicted in Dante's *Inferno*.

Pazzi is on the take from a character as scary as Hannibal: Mason Verger. When Verger was a young man busted for raping children, his vast wealth saved him from jail. All he needed was psychotherapy--with Dr. Lecter. Thanks to the treatment, Verger is now on a respirator, paralyzed except for one crablike hand, watching his enormous, brutal moray eel swim figure eights and devour fish. His obsession is to feed Lecter to some other brutal pets.

What happens when the Italian cop gets alone with Hannibal? How does Clarice's reunion with Lecter go from macabre to worse? Suffice it to say that the plot is Harris's weirdest, but it still has his signature mastery of realistic detail. There are flaws: Hannibal's madness gets a motive, which is creepy but lessens his mystery. If you want an exact duplicate of *The Silence of the Lambs*'s Clarice/Hannibal duel, you'll miss what's cool about this book--that Hannibal is actually upstaged at points by other monsters. And if you think it's all unprecedentedly horrible, you're right. But note that the horrors are described with exquisite taste. Harris's secret recipe for success is restraint. --*Tim Appelo*
