“Cory Doctorow straps on his miner’s helmet and takes you deep into the caverns and underground rivers of pop culture, here filtered through SF-colored glasses. Enjoy.” Neil Gaiman

New York Times bestselling author Cory Doctorow has been hailed as one of the freshest voices in science fiction, and this collection of intriguing novellas is yet another reason why.

Have you ever wondered what it’s like to live through a bioweapon attack or to have every aspect of your life governed by invisible ants? In Cory Doctorow’s collection of novellas, he wields his formidable experience in technology and computing to give us mind-bending sci-fi tales that explore the possibilities of information technology—and its various uses—run amok.

“Anda’s Game” is a spin on the bizarre new phenomenon of “cyber sweatshops,” in which people are paid very low wages to play online games all day in order to generate in-game wealth, which can be converted into actual money. Another tale tells of the heroic exploits of “sysadmins”—systems administrators—as they defend the cyberworld, and hence the world at large, from worms and bioweapons. **And yes, there’s a story about zombies, too.**

“He sparkles! He fizzes! He does backflips and breaks the furniture! Science fiction needs Cory Doctorow.” —Bruce Sterling, award-winning author of *Schismatrix Plus* and *The Difference Engine*
