Dragons!

Alex has a problem. He's on the run, although he's not sure who from. After a panicked phone call from Archie's mom, Kim, he gathers up the baby and hits the road, heading for Bear Creek. But when he arrives there is no sign of Kim. However, there are signs of other dragons. Particularly one special dragon, his mate, Sapphire. Raised by a mother who believed they were the last dragons, Alex and Archie are soon accepted into Sapphi's family. But will his secret put the dragon family in danger?

Just because you are a powerful dragon shifter, doesn't mean life is easy. Especially, when you decide the life you mapped out for yourself, isn't the one you want. As if things weren't complicated enough, a close encounter with her mate sends Sapphi tumbling out of the sky.

Did she mention complicated? Single-daddy-dragon kind of complicated. Not only is her mate in town, but he already has a baby. And a secret. As events unfold, Sapphi must decide where her future and her loyalties lie.

Can she find it in her heart to love baby Archie? Or will he drive a wedge between her and Alex?
